

[Reclaimed Materials | Napa Cabin – St. Helena, CA](#)

Situated in the center of wine country, this farmhouse style cabin in the woods was designed by [Wade Design Architects](#). We've worked with Luke Wade on past commercial projects and were delighted to supply our [reclaimed materials](#) to his team on this residential venture.

The Napa cabin features vaulted ceilings and walls [cladded with our patina pine](#), sourced from century-old barn boards with original weathering and saw marks. The wood used here was reclaimed from a Wisconsin dairy barn. Also incorporated in the design are nearly 2,000 board feet of our interior rough pine trim.

Like what you see? Take a look at other [Residential Projects](#) and contact us to discuss your reclaimed materials needs. [CONTACT URBAN](http://urbanevolutions.com/contact/)
